International Solar Conference

By admin

Published: 07/25/2011 - 1:13pm

SEED has attended the International Solar Conference in 2009, 2010 and 2011. This is in preparation of the expected expansion of Solar in the Southwest. Sweetwater is on the eastern edge of what industry leaders consider "good sun", which equates to a solar index of 5.5 to 6.0 KWH, per square meter, per day. As we learn more about the industry, we will be better prepared to assist those interested in exploring our region.
